

Professional Summary:

- Senior Automation and Python Developer specializing in designing and delivering enterprise-grade automation solutions, AI-powered applications, and digital transformation initiatives across Banking and Financial Services.
- Proven expertise in developing Python-based applications and enterprise automation solutions that have collectively saved more than 10,000 business hours by automating complex business processes and improving operational efficiency.
- Extensive experience in building scalable enterprise web applications, workflow automation platforms, and backend services using Python, FastAPI, Flask, Frappe Framework, ERPNext, JavaScript, and RESTful APIs.
- Strong expertise in Agentic AI, Generative AI, Large Language Models (LLMs), Prompt Engineering, AI Agents, and intelligent workflow orchestration, enabling next-generation enterprise automation.
- Hands-on experience with enterprise automation platforms including Automation Anywhere (AA360/A2019/V11), UiPath, Blue Prism, and Microsoft Power Automate, delivering automation across Desktop, Web, SAP, Mainframe, Citrix, APIs, and cloud-based applications.
- Experienced in Intelligent Document Processing (IDP) using AI-enabled OCR, Automation Anywhere IQ Bot, and advanced document extraction techniques for structured and unstructured business documents.
- Strong software development expertise in Python, JavaScript, C#, SQL, VBA, RESTful APIs, ClickHouse, PostgreSQL, and MySQL, with a focus on building scalable, secure, and high-performance enterprise applications.
- Skilled in Solution Architecture, enterprise workflow design, API integration, PDD/SDD preparation, Agile delivery, production deployments, platform migrations, and application modernization.
- Certified professional in IBM Python & AI, IBM Databases & SQL, Blue Prism AD01, Automation Anywhere Master RPA, and ClickHouse, with continuous learning in Artificial Intelligence and emerging enterprise technologies.

Professional Organization:	Cholamandalam Investment and Finance Company Senior IT Deputy Manager/Senior RPA Consultant/Analyst/Developer	June 2023-Present
	HCL Technologies Senior RPA Consultant/Analyst	Dec 2020-June 2023
	UST Global Senior System Analyst	Jan 2020-Dec 2020
	2coms Consultancy (Client: Accenture) Software Developer (RPA)	Dec 2017-Dec 2019
	Wipro LTD Analyst	July 2013-Dec 2017
	Premedia Global Senior Art Specialist	Nov 2011-July 2013
	Inscribe Graphics Graphic Designer	Aug 2009-Dec 2010

Educational Qualification:	Education	Year
	B.Sc. (Computer Science) Rajapalayam Raju's College Madurai Kamaraj University	2004 - 2007
	MCA (Distance Education) Madurai Kamaraj University Madurai	2015 - 2018
Professional Experience & Expertise	Cholamandalam Investment and Finance Company Senior IT Deputy Manager June 2023 – Present	
	- Successfully delivered 5 end-to-end Python enterprise applications leveraging modern database technologies including ClickHouse, DuckDB, PostgreSQL, MySQL, and NoSQL, enabling scalable, high-performance business solutions. - Designed, developed, and deployed 6 enterprise workflow-based applications using Frappe Framework and ERPNext, automating complex approval workflows, document management, audit trails, and business operations. - Developed and implemented 3 enterprise web applications using Python Flask and FastAPI, delivering secure RESTful APIs, backend services, and enterprise integrations. - Successfully delivered 6 enterprise RPA automation projects using UiPath, automating high-volume business processes across Web, Desktop, SAP, Citrix, and enterprise applications, contributing to more than 10,000 business hours saved through intelligent automation. - Designed and implemented Agentic AI solutions using Python, Large Language Models (LLMs), Prompt Engineering, and API orchestration, developing intelligent AI agents capable of autonomous task execution, workflow orchestration, document processing, and enterprise decision support. - Architected high-performance data migration and synchronization solutions using FastAPI, ClickHouse, DuckDB, PostgreSQL, MySQL, and NoSQL, supporting enterprise-scale data processing and analytics. - Integrated enterprise applications with SAP, Outlook, REST APIs, SQL databases, AI services, and third-party platforms, enabling seamless end-to-end automation across business functions. - Led solution architecture, technical design, PDD/SDD preparation, automation feasibility assessments, RBAC implementation, code reviews, and mentoring, ensuring secure, scalable, and maintainable enterprise solutions.	
	HCL Technologies	
	Senior RPA Consultant / Analyst / Developer December 2020 – June 2023	
	Multi-Platform RPA Engineering: Architected and developed enterprise-grade robotic bots using UiPath (leveraging RE Framework) and Automation Anywhere (AA360/A2019), managing end-to-end exception handling and deployments via Orchestrator and Control Room. Intelligent Document Processing (IDP): Engineered cognitive automation pipelines for complex unstructured data extraction using AA360 IQ Bot, UiPath Document Understanding, and AI-enabled OCR. Cross-Functional Orchestration: Automated diverse applications across Web, Desktop, Citrix, and Mainframe ecosystems, integrating them seamlessly with backend SQL databases. Agile Project Delivery: Managed development lifecycles using JIRA and Git for version control; collaborated closely with business stakeholders to map business rules and define clear project execution roadmaps.	

2coms Consultancy (Client: Accenture)
Senior System Analyst | December 2017 – December 2019

- **Pipeline Delivery:** Managed project tracking through live operational dashboards, monitoring automation health and development status across the entire RPA lifecycle for global banking/financial environments.
- **Core Bot Development:** Developed end-to-end automation scripts using Automation Anywhere V11 and Blue Prism to automate high-volume data-entry operations, Excel macro logic, and cross-platform reporting systems.
- **Stakeholder Management:** Facilitated alignment between execution squads, functional units, and corporate clients to prioritize product backlogs and eliminate development bottlenecks.

Core Advantages

- **Dual-Engine Expertise (RPA + Python Full-Stack):** Unique capability to build traditional enterprise automation (UiPath, Blue Prism, AA360) while seamlessly extending them with bespoke web apps using the Frappe Framework, FastAPI, and Flask.
 - **Agentic AI & LLM Orchestration:** Positioned at the forefront of modern automation by designing autonomous, Python-based AI agents that move beyond static rule-based paths into intelligent, context-aware decision logic.
 - **Data Architecture & Migration Competency:** Advanced understanding of high-throughput database synchronization and pipelining, specifically utilizing ClickHouse, PostgreSQL, and MySQL for large-scale data systems.
 - **Full-Lifecycle Leadership:** 15+ years of experience navigating the complete delivery spectrum—from high-level business stakeholder alignment and process re-engineering (PDD/SDD) to deep technical execution and Agile squad mentoring.
 - **Multi-Industry Enterprise Scale:** Proven adaptability across financial sectors (BFSI), global consultancies, and IT service giants, managing robust security protocols (RBAC) and complex application landscapes (SAP, Mainframe, Citrix).
-
